MINISTRY OF EDUCATION

## **National Conference on ICT in Education**

Theme :  
**“Enhancing Education through Evolving Technology”**

Jointly organised by  
Ministry of Education  
and  
University of Brunei Darussalam  
24<sup>th</sup> – 26<sup>th</sup> JANUARY 2006  
Brunei Darussalam

The first National Conference on ICT in Education carries an important theme *Enhancing Education through Evolving Technology* that will address the nation's strive towards an e-Education system agenda. It is based on the firm belief that ICT has a significant impact on teaching and learning environment. The use of information technology in education has been evolving for the last three decades. The use of computers in learning and teaching has tremendously impacted the teaching profession and several innovations have taken place around the education discipline from the management of curricula to delivery of lessons/courses/programme. In addition, the advancement of the Internet and communication, including other content delivery technologies provide added impetus to the enhancement and effectiveness of education. However, with these developments there are many challenges that need to be

overcome in order to reap the benefits of technology including changing mindsets, building human capacity, enrichment of contents, and adoption to changes.

## **AIMS**

The conference aims at providing awareness and understanding of educationists on the deployment and evolution of computer technology in education. It is also to further emphasize the role of ICT in providing quality education and address the misconception of “changing e-education by simply adding IT in education”. The workshops and discussions that will be conducted are intended to provide participants with greater insights in current development and trends in the continuously evolving and emerging e-education applications.

## **CONTENT ACTIVITIES OF THE CONFERENCE**

Participants will hear the visions, practices and experience of some of the renowned educationalists and practitioners in using innovative ICT solutions in education as well as some of the leading technocrats in shaping the technology for education of today. These keynote speakers are drawn from distinguished academic institutions, public sector agencies and corporate organisations such as Microsoft, IBM, HP, Apple Computers and etc. The conference also provides ample time for Q &A in all the preliminary sessions. One of the highlights of the conference is a Forum Session on ICT in Education that will debate opportunities and challenges in adopting appropriate technology.
