February 28 [Chat News Today] Education budget supports hiring of 3,000 staff. Alberta experienced one of its largest-ever population increases in 2022 and that resulted in more students in Alberta schools. The government is investing \$8.8 billion for education operating expenses in the 2023-24 budget and from that, \$126 million will support the hiring of 3,000 education staff that includes teachers, educational assistants and school support staff over the next three years. Better quality of education through providing more opportunities to students and teachers. [LINK](#)

February 28 [Brookings] Inflation affects the price of everything—including a college education. As college prices rise with inflation, everyone will likely pay more, but will that burden be shared equally? In the current environment, there is reason to believe that price increases may be greater for those who can afford it the least. Such an outcome would be unfortunate given the role that higher education plays in. [LINK](#)

March 02 [NBC News] California's steps to make college more affordable for undocumented students are not reaching most of them. In the state with the largest student population lacking legal immigration status, few students are receiving financial aid. "The call to expand and secure college access and affordability for undocumented scholars in California is at a critical juncture," Marlene Garcia, executive director of the California Student Aid Commission. [LINK](#)

March 02 [USA Today] SAT, ACT testing requirements paused during pandemic are now permanently optional at some colleges. Columbia University will be the first in the Ivy League college to go test optional indefinitely, it announced this week, making permanent a change ushered in during COVID. The College of William & Mary made a similar announcement, emphasizing that students can still submit test scores if they want to, but they will no longer be required. [LINK](#)

March 02 [USA Today] It's time for college leaders who fueled student loan crisis to pay up, Ed Department says. Several for-profit colleges shuttered suddenly in recent years, after their ability to enroll new students who rely on federal student aid was cut off. Thanks to various settlements, borrowers who attended these schools, such as ITT Tech and Corinthian Colleges, potentially qualify for loan forgiveness. Hundreds of thousands of these borrowers have already had billions in student loan debt erased. [LINK](#)
