

## CLUSTER 4 LOGO DESCRIPTION

Our cluster's principle has always been about empowering learning; it has embedded in our working system and has become part of our working culture. We have established partnerships and built a community of empowerment between cluster officers and school leaders over the years. It is through building great rapport, collaboration and our main driven goals in delivering continuous support and guidance for our school leaders.

The cluster logo comprises of two hands in a close proximity of uniting and in a harmony position; this metaphorically symbolizes our cluster's main goals. Also, the hands are at close proximity justifies the ownership of each and every school leader's own liberation in decisions-making and directions, providing space and time for creating their own creativity for ideas and innovations. The hands icon itself are symbols of unity and relationship/ friendship as well as care and guidance that we hope and aim for.
